FOREWORD

Road is the dominant mode of transportation in India, both in terms of share in goods and passenger traffic and in terms of contribution to national economy. Proper developed transport road network not only reduces the cost of transportation, both in terms of money and time, but also helps in the integration of various regions within the country and better motor transport connectivity with neighbouring countries at the international level. Transportation by road has remained a preferred mode of transport primarily because of easy access, flexibility of operations, door-to-door services and reliability.

Continuous and ambitious policy interventions of Ministry of Road Transport and Highways (MoRTH) has contributed towards development of a comprehensive road transport network in the country. Sustained economic growth, improved road infrastructure and increased disposable income of households have led to the rising demand for road transport. The number of registered vehicles has recorded annual growth at the rate of 9.9 percent during the last ten years (2009-2019) with 296 million registered vehicles in India as on 31st March, 2019. Personalised modes of transport (Cars and two-wheelers) constitute about 88 percent of total vehicular population.

The present issue of 'Road Transport Year Book 2017-18 and 2018-19' provide comprehensive information pertaining to registered motor vehicles overtime across States/UTs. Publication contains details on production, sales, export of motor vehicles, motor vehicles taxation, composition of registered motor vehicles, drivers and conductors licences issued, revenue realised from road transport by Centre and States etc.

I hope that the data on different facets of road transport sector analysed in this publication will be useful to administrators, policy makers and the academicians, especially those interested in infrastructure development.

I gratefully acknowledge the cooperation extended to the Transport Research Wing (TRW) by different agencies involved in motor vehicles and road transport regulation and administration. Contribution of the officers and staff of the Transport Research Wing involved in bringing out this publication is recognized and well appreciated.

MESSAGE

Road transport is the only extensive system that gives transportation to the final destination. It offers a vital link between production and consumption. Over the years, the road transport in India has recorded a considerable growth both in terms of distance as well as in terms of the output of the system. Ministry of Road Transport and Highways (MoRTH) is not only concerned about better accessibility and safer road network in the country but also about enhanced transparency and efficiency. The Sector specific policies of the Ministry has contributed significantly in increasing road network and improving the quality of public transportation system in India.

The road transport sector in India has expanded manifold after independence in terms of spread and capacity. The Number of registered vehicles on road and the volume of passenger and freight traffic handled by road transport has significantly increased over the years. The number of registered motor vehicles per thousand persons increased from 53 in 2001 to 225 in 2019 indicating improvement in accessibility of means of transport for the public. The automobile industry is rapidly growing with an annual production of over 26.4 million vehicles in 2019. Road transport sector contributes significantly to Gross Value Added, export and employment generation.

The present issue of 'Road Transport Year Book 2017-18 and 2018-19' provide wide range of information in respect of registered motor vehicles segments along with additional information in respect of production, sales, export of motor vehicles, motor vehicles taxation structure and revenue realised from road transport by Centre and States.

I hope the publication will be useful to administrators, policy makers and the academicians. I gratefully acknowledge the cooperation extended to TRW by the State/UTs, RBI, CSO, DGC&S and SIAM who have contributed a lot to bring out this publication. I also wish to express my appreciation for the support and coordination provided by my colleagues in Transport Research Wing in bringing out the publication. We look forward to any suggestions you may have in improving this document further.

PREFACE

The Road Transport Year Book is an Annual Publication of Transport Research Wing of the Ministry of Road Transport & Highways. The present issue collates data on registered motor vehicles furnished by the States and UTs for the Financial year's 2017-18 and 2018-19 for different categories of vehicles.

The present Publication provides the State / UT wise and Million Plus city wise spread of motor vehicles in India. This issue examined India's position internationally in terms of vehicle penetration ratios analysed based on the data provided by World Road Statistics, 2018 of International Road Federation, Geneva. The whole document has revamped substantially over previous versions. Besides registered Motor Vehicles, this Publication touched issues relating to road transport such as road network, production, Sale and Export of Motor Vehicles, Employment generation in transport sector and Trade performance of Motor Vehicles and parts in last five years.

The data given in the Publication sourced from States / UTs transport departments, Budget Documents, DGCI & S, NSSO, SIAM and State Finance-study of State Budget, RBI. I am grateful to the concerned authorities for furnishing the requisite data / information to TRW. The contribution of officers and staff of the Transport Research Wing deserve a special mention and has been most noteworthy. I hope this document will be a good reference for academicians, Planners, automobile manufactures, and other devout readers.

We look forward to receive comments / suggestions from the users for improving this document further.

Road Transport Sector

1.1 Roads are a primary method of transportation, used daily all around the world to transport people and cargo. Roads make a huge contribution to economic development, and bring important social benefits too. India's transport sector is large and diverse; it caters

to the needs of 1.3 billion people. India has the second largest road network in the world of about 63.86 lakh Km. This comprises National Highways, Expressways, State Highways, District Roads, Rural Roads, Urban Roads and Project Roads (Table 1.1).

Table 1.1: Road Network in India as on 31st March, 2019

Category of Road	Length in Km	% Share of Total Roads

1.2 In India, amongst the major modes of transport the road transport remains the dominant mode both in terms of its contribution to gross value added and in terms of its share in passenger and freight transported. As per the National Transport Development Policy Committee, road transport carries about 90 percent of the total passenger traffic and 67 percent freight traffic. It contributes about 3.10 percent of Gross Value Addition (GVA) as against the

total transport sector contribution of 4.63 percent to GVA at national level for the year 2018-19, where the share of Railways was at 0.73 per cent, Air Transport at 0.1 per cent and Water Transport at 0.07 percent (Table 1.2). Road transport alone accounted for about more than 64 per cent share in total transport sector contribution to GVA followed by Railways during the period 2014-15 to 2018-19 (Chart 1.1).

Composition of Road Transport

1.3 Road Transport comprises motor vehicles and Road Transport services. The share of Road Transport in the national accounts in Table 1.2 pertains only to the output or gross value addition in services component and does not include the manufacture of Motor Vehicle components of Road Transport. Road Transport is also a significant employer.

Employment Generation –Service Component

1.4 The “services” component of Road

Transport sector provide direct employment in the form of drivers and conductors / cleaners and also generate other direct and indirect employments such as accounts and administrative staff, brokers, booking agents, loading and unloading operations, wayside facilities, dhaba & hotels, petrol pump etc. In Table 1.3, the cumulative number of valid driver licenses issued has increased from 198.11 million as on 31st March 2018 to 205.84 million as on March 2019, with an increase in growth rate of

about 3.9 percent over the corresponding previous period (details at **Annexure 1.7 & 1.9**). There has been a decline in total number of valid driver's licenses issued to 10.55 million in 2018-19 from 12.10 million in 2017-18, registered a decrease in growth rate of about 12.8 percent over corresponding

previous period (Table 1.3 refer to) and details given at **Annexure 1.8 and 1.10**. The percent share of professional and non-professional valid driver's licenses in total Valid Driver's Licenses issued displayed in the Chart 1.2.

The total cumulative number of valid conductor licenses issued as on 31.3.2019 were 2.9 million and the number of valid incremental conductor licenses issued during 2018-19 were 0.12 million (**Annexure 1.12**).

Employment Generation – Manufacture of Motor Vehicles

1.6 Further, the manufacture of Motor vehicles, trailers and semi-trailers and other transport equipment also generate employment. The details of employment provided through manufacture of Motor vehicles, trailers and semi-trailers and other transport equipment i.e. under National Industrial Classification Codes 29 and 30 during the period 2012-13 to 2017-18 shown in Table 1.4.

1.7 Employment in the Motor Vehicles & other Transport Equipment has grown from 10.58 lakhs in 2012-13 to 13.65 lakhs in 17-18 (Table 1.2) at the CAGR of 4.34%, which is more than employment growth of 3.17% in total Industry. The share of automobile sector in industry employment is about 8.74% (Chart 1.3), out of which 6.52% contributed by manufacture of Motor

vehicles, trailers and semi-trailers and the remaining 2.23% contributed by the other transport equipment sector.

1.8 In total transport sector employment, more than 70 percent of employment has been generated through manufacture of Motor vehicles, trailers and semi-trailers during the period 2012-13 to 2017-18 (Chart 1.4 refer to).

Production, Sale and Export of Motor Vehicles

1.9 The production, sale and exports of motor vehicles during the period 2009-10 to 2018-19 has been analyzed based on the data of Society of Indian Automobile Manufacturers (SIAM), New Delhi and displayed in **Annexure 1.2, 1.3 and 1.4** respectively.

Production of Motor Vehicles

1.10 Production of motor vehicles consists mainly of production of passenger vehicles, commercial vehicles, three wheelers and two wheelers. The total production has increased from 14.1 million units in 2009-10 to 26.4 million units in 2019-20 (Chart 1.3), with a CAGR of 6.49 per cent. The YoY growth rate presented in Chart 1.4 depicts a declining trend and has turned to about -14.7 in 2019-20.

Chart 1.4: Total Production of Motor Vehicles (in million)

1.11 The category wise production of motor vehicles displayed in the Chart 1.5 show that production of two wheelers constitute the highest share in total production followed by passenger vehicles. Details on production of motor vehicles are at **Annexure 1.2**. The total production of two wheelers has increased from 10.5 million in 2009-10 to 21.0 million in 2019-20. Total production of passenger vehicles has increased from 2.4 million in 2009-10 to 3.4 million in 2019-20, with a slight decline in production in 2019-20.

Production of three wheelers and commercial vehicles depicts more or less constant trend over the period from 2009-10 to 2019-20 (Chart 1.5 refer to). Amongst all motor vehicles, two wheelers has the highest share (79.82 %) in total production followed by passenger vehicles (13.03%) in 2019-20. Category wise trend in the growth rate of production of vehicles displayed in Chart 1.6 show mixed trend, declining from 2018-19 onwards for all categories. The category wise breakup presented in **Annexure 1.2**.

Sale of Motor Vehicles

1.12 Sale of motor vehicles (including export) has been increasing over the years from 2009-10 to 2019-20, except for a decline in 2019-20. The total sales has increased from 14.1 million in 2009-10 to 21.5 million in 2019-20, with a CAGR of 4.33 percent. The

growth rate in production of vehicles presented in the Chart 1.8 show declining trends and details is at **Annexure 1.3**. Two wheelers has the highest share in total sales 17.4 million (80.8%) followed by passenger vehicles 2.8 million (12.98%) in 2019-20. (Refer to Chart 1.9 and 1.10).

Exports of Motor Vehicles

1.14 Exports of Motor Vehicles have been displaying an increasing trend since 2009-10. It has increased from 1.8 million in quantity terms in 2009-10 to 4.8 million in 2019-20,

accounted for a CAGR of 10.20 % (refer to **Annexure 1.4**). Trend in growth rate show mixed trend, which has declined from 14.5 percent in 2018-19 to 3.0 percent in 2019-20 (refer to chart 1.12).

1.15 It may be noted that certain categories of motor vehicles like Passengers cars, Light Commercial Vehicles, Vans and Mopeds have shown a decline in Exports in 2019-20 as compared to 2018-19 (**Annexure 1.4** refer to). Amongst the categories of automobile export,

two wheelers has shown increase in export from 3.28 million in 2018-19 to 3.52 million in 2019-20 (Chart 1.13). Two wheelers shares about 73.9 percent of total automobile export followed by passenger vehicles 14.2 percent in 2019-20 (Chart 1.14 refer to).

Trade Performance of Motor Vehicle & Parts in last Five Years

1.16 The data in Table 1.5 show that India has a positive trade balance in the automobile export sector and has been growing at a CAGR of 5.21%. The Trade Competitiveness

Index (TCI)¹ for automobiles ranges between 0.23 and 0.28 reflecting that the sector is trade competitive. Automobile exports of US\$ 17.25 billion account for 5.69 % of India's total exports implies that automobiles are a significant foreign exchange earner.

¹ The formula of Trade competitiveness index (TCI) is calculated as $TCI = (E_j - I_j) / (E_j + I_j)$ where E_j is on behalf of one kind of industry exports of a country and I_j is the imports.

The value of TCI varies between 1 and (-) 1 and the interpretation is that if $TCI > 0$, it means this industry is in a dominant position. Contrarily, if $TCI < 0$, it implies that the respective industry has a negative trade balance and is not competitive.

Passenger and Freight traffic movement by Roads

1.19 The availability date on passenger traffic and freight traffic movement by roads presents a serious challenge, as there is no data available for this segment unlike the Airways and Railways, which are better organized. However, TRW has been making projections of passenger traffic and freight traffic based on the GDP growth rate and the elasticity of freight traffic of 1.4 and passenger elasticity

of 1.9 as provided by the National Transport Development Committee in 2014 (**Annexure 1.6** refers to). The estimated volumes of freight and passenger movement by road transport is at **Annexure 1.6**. Both freight and passenger movement by road has been increasing since 1999-2000, whereas trend in the growth rate show mixed trend and declining since 2016-17 (Chart 1.15 and 1.16).

Registered Motor vehicle in India

2.1 Registered vehicles consists of Transport and Non Transport vehicles. In 2019-20, about 92 percent of registered vehicles are non-transport vehicles in India. There has been a continuous increase in the number of registered motor vehicles in India since

1951 (refer to **Annexure 2.1**). The total number of registered vehicles has increased from 0.3 million in 1951 to 295.8 million in 2019 (Chart 2.1). The total registered vehicles in the country grew at a CAGR of 9.91 percent during 2009-2019.

2.2 Category wise growth of registered motor vehicles depicts, amongst all categories of vehicles, two-wheelers account for highest number of registration 221.3 million in 2019 (75%) followed by Cars, Jeeps and Taxis 38.4 million (13%), seen in Chart 2.2. Buses including omnibuses, which are the main mass transport vehicles on the roads, have

shown a growth rate of 5.5 % in 2019 over 2018. However, they account for only 1% (2 million) of the registered traffic on the roads (Chart 2.2). All categories of vehicles have displayed a mixed trend in the growth rate over the period 1960 to 2019 (Chart 2.3 refer to). Details are at **Annexure 2.1**.

The combined share of cars, jeeps and taxis in the total number of registered vehicles was 13.37% in March 2018 and 12.99% in 2019, marking a steep decline from 52% in 1951. The share of buses in total registered vehicles has declined from 11.1% as on 31st March 1951, to 0.71% as on 31st March 2018 and 0.69% as on 31st March 2019. Omni buses have

also been included in the fleet of buses from 2001. The share of registered goods vehicles in the country, which had accounted for 26.8% in 1951 declined to 4.69% in March 2018 and 4.65% in March 2019 of the total vehicles in 2017. The share of 'Other vehicles', which include tractors, trailers, three wheelers (passenger)/ Light Motor Vehicles (LMVs) and other miscellaneous vehicles, increased from 1.3% in 1951 to 6.85% during 2017-18 and 2018-19.

2.4 Apart from the sheer dominance of the total vehicular population in India by two-wheelers, this category of vehicle has seen steady growth, though at a lower rate in recent years, whereas the share of buses has declined over the years (Table 2.1 refer to). This preference of road users for personalised means of transport over public transport appears to have been dictated by reasons such as personal convenience, economic conditions as also by the failure of public transportation system to keep up with the demand.

Composition of Registered Vehicles Population in India

2.5 Registered vehicles consists of Transport and Non Transport vehicles. Out of total 295.77 million vehicles registered in 2018-19, about 269.88 million vehicles are in the non-transport category and the remaining 25.89 are in the transport category (Table 2.2). That is, more than 91 percent of vehicles registered are non-transport vehicles.

Transport Vehicles

2.6 Transport vehicles include Multiaxled/ Articulated vehicles, Trucks and Lorries, Light Motor Vehicles (Goods & Passenger), Buses, Taxis, Motor Cycles on hire etc. Total number of transport vehicles has increased from 23.97 million in 2017-18 to 25.89 million in 2018-19 (Table 2.2), accounted for a growth rate of about 8.03 percent over previous period. Total number of newly registered transport vehicles increased from 1.92 million in 2017-18 to 2.14 million in 2018-19, registered a growth of rate of about 11.9 percent over the previous period. The details of category wise newly registered vehicles during 2017-18

and 2018-19 and total registered vehicles as on 31st March 2018 and 2019 are at **Annexure 2.2.**

2.7 In 2017-18, out of 24.42 million newly registered vehicles, 1.9 million (7.84%) vehicles registered are in the Transport vehicles category. Similarly, out of 24.56 million newly registered vehicles in 2018-19, 2.14 million constitutes transport vehicles (91.16%), seen in the Table 2.2. Light Motor Vehicles (Passenger) has the highest share i.e. 30 % (0.64 Million) in newly registered transport vehicles in 2018-19 (Chart 2.4) followed by Light Motor Vehicles (goods) with share of 24% (0.52 million) and Trucks and Lorries with share of 18 % (0.4 million).

Chart 2.4: Category wise share of Newly Registered Transport Vehicles in 2018-19 (in percent)

Non-Transport Vehicles

2.8 Non-Transport vehicles include Two Wheelers, Cars, Jeeps, Omni Buses, Tractors, Trailers etc. Total number of non-transport vehicles has increased from 248.62 million in 2017-18 to 269.88 million in 2018-19 (Table 2.2), accounted for a growth rate of about 8.55 percent over previous period. Non-transport vehicles constitute more than 91 percent of total vehicles registered in the country. Newly registered non-transport vehicles constitute about 22.5 million in 2017-18, which has marginally decreased to 22.42 million in 2018-19. In 2017-18 and 2018-19, more than 91% of newly registered vehicles are in non-transport category, thereby the real culprits for increase in

road congestion. Out of the non-transport vehicles, two wheelers alone account for about 74% share in total registered motor vehicles in the country.

2.9 In 2017-18, out of 24.42 million newly registered vehicles, 22.5 million (92.1%) vehicles registered are in the Non-Transport vehicles category. Similarly, out of 24.56 million newly vehicles registered in 2018-19, 22.42 million constitutes non-transport vehicles (91.2%), refer to Table 2.2. In 2019, within the category of newly registered non-transport vehicles, two wheelers has the highest share i.e. 83.2 % (18.64 Million) followed by Cars with share of 11.7% (2.62 million) and Tractors with share of 2.8% (0.63million), refer to Chart 2.5.

2.10 Data on number of vehicles in use is crucial for understanding issues such as traffic congestion. This publication attempted to collect information pertaining to commercial transport vehicles in use as furnished by States/UTs based on valid

primary permits issued by them (refer to Annexure 2.3). Number of commercial vehicles in use was 12.75 million as on 31st March, 2018, which has slightly declined to 12.67 million as on 31st March, 2019. Details are at **Annexure 2.3** and **2.3(a)**.

Chart 2.6: Category wise share of commercial vehicles in use (in percent)

2.11 Goods Carriages have the highest share of 53.06% and 52.41% respectively in 2018 and 2019 in total number of commercial vehicles in use (Chart 2.6), followed by Contract Carriage with share of 42.46% & 42.89 % respectively. It may be seen in the Chart 2.9 that there has not been much variation in the category wise share of commercial vehicles in use between 2018 and 2019. The commercial vehicles in use shares about 53 % and 48.95% of total registered transport vehicles respectively as on 31st March, 2018 & as on 31st March 2019 (**Annexure 3.6** refer to).

Composition of Private and Public Transport

2.12 There has been an increase in the total

number of buses, which increased from 18 thousand in 1961 to 151.7 thousand in 2019(P), an increase of more than 8 times. Trend in the growth of total number of buses owned by Private sectors has depicted an increasing trend over the period from 1961 to 2019, whereas that of Public sector buses has shown a more or less constant trend (Chart 2.7). Similarly, percentage share of private sector buses in total number of buses has been increasing over the period 1976 to 2019, with a share of about 92.6 % of total buses in the country in 2019 (Chart 2.8 refer to). Public Sector shared about 31.7 percent of total buses in the country in 1961, which has declined drastically to 7.4 percent in 2019.

Road Transport and Motor Vehicle Taxation in India

6.1 In the road transport sector, regulation and taxation of motor vehicles are treated as two distinct powers. The regulation of Motor vehicles falls within the Concurrent List (List III, Entry 35 refer to), which is jointly exercised by both the Central and State Governments with residuary powers with the Centre, whereas the taxation of motor vehicles essentially falls within the ambit of State List (List II, entry 56 & 57 refer to).

6.2 The Central Government thus regulates motor vehicles under the Indian Motor Vehicles Act, 1988, and Central Motor Vehicles Rules, 1989. The levies charged under the Act including fees for registering motor vehicles; obtaining driving licenses; transfer of ownership of motor vehicles;

issue of permits and certificate of fitness of transport vehicles are levied by State Transport Departments. Besides the levy of above-mentioned fees, States also levy taxes like the Motor Vehicle Tax (also referred to registration fees in some States), the passenger and goods tax, etc.

6.3 Under the pre-GST regime, the Union Government levied excise duty & import duties on Motor vehicles and Accessories, tyres and tubes, High Speed Diesel and Motor spirit and service tax on certain road transport services like the rent a cab scheme, tour operator services etc. The Revenue realized from Road Transport by the Centre for the period 2009-10 to 2018-19 is presented in the Table 6.1.

6.4 Revenue realized from road transport by Centre has increased from Rs. 0.48 lakh crore in 2009-10 to Rs. 1.21 lakh crore in 2018-19. However, since 2016-17, there has been a decline in revenue i.e. from Rs 2.8 lakh crore in 2016-17 to Rs.1.21 lakh

crore in 2018-19. Year on year growth depicts a mixed trend, but declining since 2015-16 and registered a decline in growth of about 33.1 percent in 2018-19 over the previous period (Chart 6.1 refer to).

6.5 The trend of growth of various source of revenue (Chart 6.2) indicates that the revenue from High Speed Motor Vehicles has the largest share Rs 101 thousand crore followed by Motor Vehicles & Accessories with Rs 19.2 thousand crore and Tyres and Tubes with Rs 1.1 thousand crore. Motor Sprit had the largest share until 2011-12,

however declined to zero due to GST. In the post GST period, revenue from all source depicts a declining trend. Percent share of High Speed Motor Vehicles in total revenue from road transport depicts increasing trend over the years from 2009-10 to 2018-19, for others it is either more or less constant or declining (Chart 6.3).

6.6 Thus, may be noted that High speed diesel oil is the single most important source of revenue for the Government with a share of 83.3%

followed by Motor Vehicle & Accessories of 15.8% and tyres & tubes of 0.9% in 2018-19 (Chart 6.4).

6.7 Revenue collected by the State Government from various subsectors of road transport sector (Chart 6.5) has increased from Rs 12,901.7 crore in 2000-01 to Rs 72,115.6 crore in 2018-19 (Annexure 5.2), an

increase of more than 5 times. However, year on year growth for the period 2000-01 to 2018-19 depicts a mixed trend, which declined from about 1.7 percent in 2017-18 to about 8.3 percent in 2018-19 (Chart 6.5).

6.8 In terms of composition, revenue from tax on motor vehicle constitute about two-thirds of the combined revenue of States and UTs from road transport whereas taxes on passenger and goods constitute the balance one-third (Chart 6.6 refer to). Motor Vehicles Tax and Fees has increased from Rs 64,914.8 crore in 2017-18 to Rs 68,575.3

crore in 2018-19, with a growth of about 5.6 percent over previous period. The Tax on Passengers and Goods has decreased from Rs 13,719.2 crore in 2017-18 to Rs 3,504.3 crore in 2018-19. Details attached in **Annexure 5.2**. The YoY growth shows mixed trend and declining since 2017-18.

6.9 State wise distribution of revenue from Road Transport (Chart 6.7) indicates that Maharashtra (13.1 %) has the largest share followed by Uttar Pradesh (9.6%), Karnataka (9.1%), Tamil Nadu (7.7%) and

Rajasthan (6.4%). These top five States account for about 46 percent of total revenues of road transport. Details are at **Annexure 5.3**.

Chart 6.7: State wise distribution of revenue from Road Transport during 2018-19

6.10 The revenue generated by States and UTs with legislatures from tax on Motor Vehicles and taxes on Goods and Passengers constitutes, on an average, 6.96% and 5.95% of their combined own tax revenue in 2017-18 and 2018-19 respectively (**Annexure 5.3**). The magnitude of the revenue significance of these taxes differs widely across States; from as low as 2.97 percent of its own tax revenue in case of Arunachal Pradesh to 15.89 percent of own tax revenue for Nagaland. Among major States, the revenue from motor vehicle and goods & passenger taxes constitute from 5.24 per cent of own tax revenue for Andhra Pradesh to 28.17 percent for Bihar.

6.11 The new National Permit System introduced in May 2010 to provide a framework for uninterrupted movement of goods vehicles across the country authorizing the permit holder to operate throughout the country. Under the system, national permit can be granted by the home

State on payment of requisite authorisation fee and annual fee. The consolidated fee so collected is distributed among the States and UTs based on a formula based upon the average composite fee received by the States/UTs during previous three years. A Statement of the comparison of fee received in National Permit Account by States/UTs is at **Annexure 5.4**.

6.12 Different States use different basis for computation of registration fees, goods tax and passenger tax such as cost of vehicle, engine capacity, unladen weight, seating capacity etc. and use different rates, different periodicity rendering inter State comparisons of the above taxes incomparable. There is a complex matrix, which emerges once we try to put together the tax structure for different segments of Transport (Stage Carriage/ Contract carriage) and Non-transport Vehicles for different States together (**Annexure 5.5**).

6.13 It may be noted from **Annexure 5.5** that most States have switched over to one time tax /lifetime tax (LTT) in respect of the Motor Vehicle Tax for two-wheelers, cars and Taxis belonging to the Non Transport category. In the case of Transport Vehicles for passengers, the passenger tax rates are differentiated based on whether the vehicle is for stage or contract carriage, with the seating capacity generally forming the basis for levying tax. Many States differentiate in

taxes based on type of service (Ordinary/Luxury/Express etc.) as also based on the area where the vehicle is plying as. In some States, routes are divided into different categories as in mofussil versus town, city versus rural areas etc. Goods vehicles are usually taxed based on the registered laden weight (RLW) or gross vehicle weight (GVW) or unladen weight (ULW) and they are based on one time tax, quarterly and annually respectively.
